

National Registry of Emergency Medical Technicians Advanced Level Psychomotor Examination

PATIENT ASSESSMENT - TRAUMA

Candidate:	Examiner:		
Date:	Signature:		
Scenario #		Possible	Points
	NOTE: Areas denoted by "**" may be integrated within sequence of primary survey	Points	Awarded
Takes or verbalizes appropriate PP	E precautions	1	
SCENE SIZE-UP Determines the scene/situation is s	rafa	1	
Determines the scene/situation is s		1	
Determines the number of patients		1	
Requests additional help if necessary		1	
Considers stabilization of spine		1	
PRIMARY SURVEY/RESUSCITATI			
Verbalizes general impression of th		1	
Determines responsiveness/level o		1	
Determines chief complaint/appare	nt life-threats	1	
Airway -Opens and assesses airway (1	point) Incorts adjunct as indicated (1 point)	2	
Breathing	point) -Inserts adjunct as indicated (1 point)		
-Assess breathing (1 point)			
-Assures adequate ventilation (1 point)	4	
-Initiates appropriate oxygen the			
-Manages any injury which may	compromise breathing/ventilation (1 point)		
Circulation			
-Checks pulse (1point)			
-Assess skin [either skin color, temperature, or condition] (1 point)			
-Assesses for and controls major			
-Initiates shock management (1	point)	4	
HISTORY TAKING	ansport decision based upon calculated GCS	1	
Obtains, or directs assistant to obtain	ain haseline vital signs	1	
Attempts to obtain SAMPLE history		1	
SECONDARY ASSESSMENT			
Head			
-Inspects mouth**, nose**, and	assesses facial area (1 point)	3	
-Inspects and palpates scalp ar			
-Assesses eyes for PERRL** (1	point)		
Neck**			
-Checks position of trachea (1 p -Checks jugular veins (1 point)	oont)	3	
-Palpates cervical spine (1 point)			
Chest**	· ·		
-Inspects chest (1 point)		2	
-Palpates chest (1 point)		3	
-Auscultates chest (1 point)			
Abdomen/pelvis**			
-Inspects and palpates abdome	n (1 point)	3	
-Assesses pelvis (1 point)			
-Verbalizes assessment of genitalia/perineum as needed (1 point)			
Lower extremities**	es motor, sensory, and distal circulatory functions (1 point/leg)	2	
Upper extremities	es motor, sensory, and distar circulatory functions (1 pointineg)	_	
	ses motor, sensory, and distal circulatory functions (1 point/arm)	2	
Posterior thorax, lumbar, and butto			
-Inspects and palpates posterio	r thorax (1 point)	2	
-Inspects and palpates lumbar a	and buttocks area (1 point)		
Manages secondary injuries and w	ounds appropriately	1	
Reassesses patient		1	
Actual Time Findade	TOTAL	42	
Actual Time Ended:	TOTAL	42	
CRITICAL CRITERIA			
Failure to initiate or call for tra	ansport of the patient within 10 minute time limit		
Failure to take or verbalize ap	·····		
Failure to determine scene sa			
	vide spinal protection when indicated		
	y provide high concentration of oxygen		
Failure to assess/provide ade	equate ventilation y manage problems associated with airway, breathing, hemorrhage or shock [hypoperfusion]		
	's need for immediate transportation versus continued assessment/treatment at the scene		
	r physical exam before assessing/treating threats to airway, breathing, and circulation		
Failure to manage the patient			
	with nations or other personnel		

You must factually document your rationale for checking any of the above critical items on the reverse side of this form.

Uses or orders a dangerous or inappropriate intervention
